

Skirting Systems Conveyor Belt Scraper Rubber

IMTECH[®] Flexi-Clean and TechSeal offer excellent belt cleaning characteristics.

Keep your belts clean and smooth.

Flexi-Clean

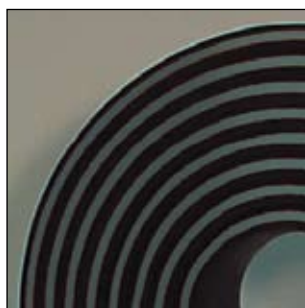

IMTECH[®] Flexi-Clean Conveyor Belt Scraper Rubber provides excellent cleaning power against granulated, sticky and washed material.

Constructed of premium quality natural and synthetic rubbers, Flexi-Clean is comprised of an inner layer of flexible 45 durometer rubber sandwiched between two layers of 60 durometer rubber, providing excellent rigidity and outstanding wear life.

Flexi-Clean must be mounted so that it protrudes from its support no more than 1-1/2 times its thickness in order to prevent it from bending during service.

Flexi-Clean BGB

Flexi-Clean Black Grey Black (BGB) is fabricated using the same high-quality natural and synthetic rubbers as the standard Flexi-Clean product, except the inner layer is a slightly stiffer (yet flexible) 50 durometer rubber that is sandwiched between two layers of 85 durometer rubber for an even more rugged scraper product that is designed specifically for the most extreme applications.

Product Availability

IMTECH[®] Flexi-Clean and Flexi-Clean BGB are available in the following standard sizes.

Part No.	Thickness	Available Widths	Length
FC-00	1"	6", 8", 60"	33"
FC-00	1-1/2"	6", 8", 60"	33"
FC-00	2"	6", 8", 60"	33"
FCBGB-00	1"	6", 8", 60"	33"
FCBGB-00	1-1/2"	6", 8", 60"	33"
FCBGB-00	2"	6", 8", 60"	33"
